**Portfolio:** <https://robert-rousset.github.io/react-portfolio> |

**LinkedIn:** <https://www.linkedin.com/in/robert-rousset-3a8300193> |

**Github:** <https://github.com/Robert-Rousset> |

A highly motivated Web Developer with a Certificate in Full Stack Web Development from the University of Western Australia, a background in graphic design and an avid desire to create refined and meaningful user experiences. Have gained ample knowledge in JavaScript, CSS, HTML and a wide range of backend and frontend frameworks. Excellent ability to solve technical problems in a collaborative environment. Looking to further my knowledge in programming by becoming a valued member of a hard working, fast paced and fun web development team.

## Technical Skills

**Languages:** JavaScript ES6+, CSS3, HTML5, MySQL

**Applications:** Git, Jest, Bash

**Tools:** Node, Express, React, Handlebars, jQuery, Bootstrap, Bulma, Mongo, Sequelize

## Deployed Applications

**Immortal Kombat** - <https://immortal-kombat.herokuapp.com> | <https://github.com/Robert-Rousset/immortal-kombat>

**Overview** - A tactical survival game where the player is up against endless waves of stronger enemies.

**Skills & Languages Used** - HTML, CSS, JavaScript. React for rendering of menus and scoreboard. Kaboom.js provided an easy to use game library for the development of the game. MongoDB and GraphQL for database manipulation.

**MMM Farm Online Store** - <https://robert-rousset.github.io/MMM-Farm-App> | <https://github.com/Robert-Rousset/MMM-Farm-App>

**Overview:** The Application was designed to let customers order their products online, allowing the staff to pack and prepare the orders before their arrival.

**Skills & Languages Used:** HTML, CSS, BULMA, JavaScript. Gained knowledge of the Google Maps API and Libraries. Used SMTP to send emails from the application. Has been designed to be accessible across all devices. Effectively Delegated Tasks and roles evenly among the group members. Communicated the course of action and made use of good time management to deliver the application before the deadline.

**Headquarters** - <https://safe-beach-27101.herokuapp.com> | <https://github.com/Robert-Rousset/headquarters>

**Overview:** An Application that helps students keep track of a list of tasks as well as use a timer, and read motivational information.

**Skills & Languages Used:** HTML, CSS, JavaScript. Handlebars for HTML rendering. Made use of a Sequelize Database to store and collect information.

## Experience

### MMM Farm

(November 2018 - Current)

#### Full time Farm Hand

Anketell, Western Australia.

- Taught many groups of Veterinarian students a diverse range of livestock handling duties and delegated various tasks to make efficient use of time while maintaining the farm.
- Designed various regulation forms and tables for management of produce and analysis of livestock.
- Re-organized and updated customer data on the accounting software MYOB which streamlined the usability of the software and improved tracking of customer orders.

## Education

University of Western Australia -- Certificate, Full Stack Web Development

(2021)

SAE-Institute Perth -- Diploma, Music Production

(2019 - 2020)
